

QASSIM UNIVERSITY- COLLEGE OF ENGINEERING

COURSE ENTRY/ EXIT SURVEY (starting 2020)

Course: GE 211: INTRODUCTION TO ENGINEERING DESIGN I

Semester & Year: . FALL/SPRING 144.....

Group:..

(The following information is required only at the first submission)

Student ID:

Student First Name:(optional)

Please circle the best choice of you for the following:

Are you able to:		<i>Preparation</i>				
		Poor				Excellent
CLO_1	Develop and exhibit the behaviors associated with taking personal responsibility for time management, classroom expectations, professional and ethical behaviors in the class, and academic integrity, etc	1	2	3	4	5
CLO_2	Practice elements of active learning as well as apply active learning techniques such as Engineering Journal, Facilitator Signal, Process Check	1	2	3	4	5
CLO_3	Explain quality, costumer, expectations, and process as well as demonstrate the ability to meet customer expectations	1	2	3	4	5
CLO_4	Develop team norms.	1	2	3	4	5
CLO_5	Use effective team-tools such as team agenda, minutes and team process check as well as team dynamics tools such as maintenance phase.	1	2	3	4	5
CLO_6	Use team discussion tools such as Boggle method, affinity process, deployment flowchart, multi-voting and prioritization techniques.	1	2	3	4	5
CLO_7	Explain problem solving strategies such as using heuristic, perceiving problems, potential problem, real problem, etc.	1	2	3	4	5
CLO_8	Explain problem definition techniques such as exploring the problem, present state/desired state, Dunker diagram, statement restatement, KT Problem Analysis and apply them on semester design project.	1	2	3	4	5
CLO_9	Explain idea generation techniques such as Osborn's Checklist, random stimulation, fishbone diagram as well as apply them on semester project	1	2	3	4	5
CLO_10	Explain situation analysis, problem analysis, decision analysis, potential problem analysis and apply these techniques on semester design project.	1	2	3	4	5
CLO_11	Explain planning components such as Gantt chart, deployment chart and critical path management and apply them on semester design project.	1	2	3	4	5
CLO_12	Explain ethical issues, safety considerations, and environmental, social and cultural impact and evaluate them on semester design project.	1	2	3	4	5
CLO_13	Demonstrate the fundamentals of organizing and presenting technical work using modern engineering tools in their written and oral presentation.	1	2	3	4	5
CLO_14	Describe their chosen field of engineering as well as identify other fields of engineering.	1	2	3	4	5
CLO_15	Explain stages of level of learning (LOL) and degree of internalization (DOL) and apply them on example.	1	2	3	4	5
CLO_16	Use organization techniques such as book keeping (Design Notebook), using checklist, etc.	1	2	3	4	5
CLO_17	Search and collect information and rearrange it for a given topic	1	2	3	4	5

* 1:Poor, 2:Fair, 3:Good, 4:Very good, 5: Excellent
