

الاجتماعات التي لا ترحم

كثيراً ما تسفر الاجتماعات عن الشعور الحاد بالملل والضيق مع تبديد الكثير من الوقت الثمين، ولكن لا غنى لأي فريق عمل عن عقد الاجتماعات الدورية لاتخاذ القرارات الضرورية لسير العمل، وكلما ارتقى المرء في الهرم الوظيفي أو الإداري لزمه حضور المزيد والمزيد من هذه الاجتماعات.

ويؤكد هذا العرض على أهمية الإدارة الناجحة للاجتماعات لأن فشل إدارة الاجتماع يعني استنزاف للوقت والجهد من غير الحصول على أي عائد مفيد.
إن حسن إدارة الاجتماعات ليس موهبة وإنما هي خبرة تكتسب بالمران والتدريب، وتعتمد على أسلوب من خمسة نقاط:

1. (PLAN) التخطيط المسبق للاجتماع وتحديد أهدافه والمواضيع التي سيتم مناقشتها.
2. (INFORM) إخطار الأعضاء بجدول الأعمال وتزويدهم بما يحتاجون من معلومات ترتبط بالمواضيع محل النقاش، وبالأدوار المرتقبة منهم في المناقشات.
3. (Prepare) الاستعداد للاجتماع بتحديد التسلسل المنطقي للمواضيع وتحديد حصص الوقت المخصصة لكل موضوع حسب أهميته.
4. (Structure & Control) هيكلية المناقشات و التحكم فيها والسير بها من الأدلة إلى التفسير ثم إلى القرارات.
5. (Summarize & Record) تلخيص القرارات وتسجيلها على الفور وتوجيهها لمن يختص بتنفيذها.

يعتمد العرض في شرحه للنقاط السابقة على العديد من المشاهد يبدأ برويتنا لأحد المدراء الذين يقتضي عملهم رئاسة العديد من الاجتماعات (الفاشلة) لفريق عمله، ويعاني من شعور بالفشل رغم مثابرته الشديدة على إنجاح تلك الاجتماعات إلى حد أخذه لأوراق العمل إلى منزله، وينتقل بنا

العرض إلى أن ينام هذا الشخص وهو لا يزال يفكر في اجتماع الغد المرتقب، ويتعرض خلال نومه إلى كابوس مزعج يحلم فيه بأنه يمثل متهماً أمام محكمة تتهمه بسوء إدارة الاجتماعات وتضييع الوقت في غير طائل وإفشال المجتمعين في الوصول لقرار بخصوص المواضيع المطروحة في الاجتماعات. وتأخذ المحاكمة طابعاً هزلياً حيث تعاني بدورها من بعض عيوب الاجتماعات الفاشلة لاسيما حين يختفي المتهم من قفص الاتهام لتجده يتقمص دور الحاجب أو المدعي.

إن الاتهامات التي وجهتها المحكمة لهذا المدير (خلال الحلم) تعضدها أدلة اتهام دامغة تأتي من مشاهد واقعية للمتهم وهو يدير اجتماعاته السابقة، ويمكن تلخيص تلك الاتهامات كما يلي:

1. حضور المتهم الاجتماع دون إعداد مسبق ودون تحديد للهدف من الاجتماع ودون محاولة التفكير فيما يمكن أن يسفر عنه الاجتماع.
2. عدم إخطار الأعضاء سلفاً بجدول الأعمال وعدم إعلامهم بما يحتاجون من تفاصيل أو الأدوار المتوقعة منهم خلال المناقشة.
3. سوء ترتيب جدول الأعمال وإساءة توزيع الأوقات على المواضيع المتباينة الأهمية.
4. عدم التحكم التام في سير الاجتماع وترك المناقشات تسير في أي اتجاه كان.
5. عدم تلخيص القرارات و لا تسجيلها.

وخلال الكابوس المخيف يتوعد القاضي المتهم بالويل والثبور وعظائم الأمور، ولكن أساريه تنفرج فجأة ليعلن عن استعداده للرافة بالمتهم وإتباع اللين معه إن هو قدم ملخصاً للحلم الذي يعيشه، ونجح المتهم في تقديم ملخص وافٍ لمتطلبات الاجتماع الناجح فيعفيه القاضي من العقاب ويسمح له بالاستيقاظ بعد أن حصل منه على إقرار بذنبه وخطيئته.

Assignment # L-2: Setting Team Norms (from 481)

PI (5.1)

You will develop Team Norms for your semester team during an **in class** team meeting held during Lab. You can read about Team Norms in Section H of the Blue Workbook and get a rough agenda for the **in class** team meeting by looking at pages H10 to H11 in the Blue Workbook.

The **in class** meeting will be using a technique called Force Field Analysis (see page K9 in the Blue Workbook), which lists the Promoters and Barriers to a proposed change. **Each team member**, on their own, must do the following preparation work **before** coming to the meeting (i.e., before coming to class).

In general the road map of this assignment is as coming:

Step (1) (completed individually before class)

1. Prepare a list of promoters of effective teams and a separate list of barriers to effective teams.
2. Each promoter and each barrier should be on a **separate post-it or index card**; these post-its or index cards will be used in the Affinity Process (see slides **K-4** and **K-5** in the Blue Workbook).
3. Each promoter and each barrier should be stated using **seven or fewer** words; a **noun** and a **verb** should be included [e.g., *Celebrate the completion of every task.*]
4. A set of at least **ten** well-stated promoters and **ten** well-stated barriers is expected; you may want to review slides **G-14** and **G-15** (Those Unwelcome Group Members).

Step (2) (started as a team during class) ... started (not completed)

These individual lists will be used in class. Duplicate items in the lists will be eliminated using the Boggle Method; the remaining items will be grouped using the Affinity Process. Finally, Team Norms will be developed to enhance the Promoters of, and/or reduce the Barriers to, functioning as an effective team. (the class time is very limited; that is why whatever left will be the student responsibility to get it finished outside of class)

Step (3) (to be completed by team after the class)

After the class, the team must meet and complete the exercise, i.e., complete whatever left from **step(2)** and generate a set of norms that the team will use. These norms (and the work generated in creating them) should be placed in the team's Design Notebook in the Team Meeting section. The first notebook assessment (1st notebook assessment checklist) will check to see that the norms are present in the notebook.

The submission

The main parts of the assignment (context, body, Etc.):

- must be in English and word-processed.
- must not exceed 4 pages (not papers).
- The 4-pages must be uploaded to the associated BB-link prior to the due time. **No hard copy is required.**

The rest of the assignment-work; includes the following:

The correct checklist, the PTW checklist, appendices the team response sheet, the cardsetc.

- Neither need not to be in English nor word-processed.
- Has no page limits
- Are to be submitted with the two checklist on the top (in the correct order and orientation)

The assessment

- The original assessment will be done according to the assignment and the PTW checklists.
- The re-submission of the assignment will be assessed according to the correction checklist and the PTW checklists.

Assignment L-3 - (Preparing Design Notebook)

Modified version by 2026

All the work that your team does in the lab during the semester is to be collected, organized, and presented in a team Design Notebook. As used by engineers in design throughout the profession, the Design Notebook organizes work so that it can be easily located and understood by other engineers.

The Assignment's Learning Objectives

The learning objectives for this assignment are for the team to:

1. **Demonstrate** that it can organize technical work in an accepted, standard format, and
2. **Demonstrate** that it can do self- and peer-assessment of work using checklists.

The Assignment

- The team will need to purchase a 2-inch three-ring binder and at least five tabbed dividers. Your Notebook should be organized according to the material found in [Part II of Section J of the Blue Workbook](#).
- This assignment will be assessed using the [Zeroth Assessment Checklist](#). As the team prepares its Notebook the team should go over each item in this checklist and ask: “**Have we done this?**” You can see from the checklist that the important items concern the organization of the notebook.

The Assessment

- Your team must first assess your Design Notebook before you come to class. During Lab 3.2 your Notebook will be peer assessed by another team. This first assessment of your notebook uses the [Zeroth Assessment Checklist](#), which is found in the handouts.
- If this assignment is assessed as [NI, NCE, or NS](#), you may improve the assignment and resubmit it following the directions given in the resubmission of work assignment, which is also found in the handouts.

The Submission

Your team is expected to bring its Design Notebook to class with the [Zeroth Assessment Checklist completed](#).

Zeroth Notebook Assessment Checklist (2026)

Team_____

Work Products Being Evaluated: Design Notebook Structure

1. Work Evaluated by (self)_____ Assessment Symbol/Color _____ Date_____
2. Work Evaluated by (peer)_____ Assessment Symbol/Color _____ Date_____
3. Work Evaluated by (instructor)_____ Assessment Symbol/Color _____ Date_____

This Checklist must be completed (self-assessed) before submission for assessment

Yes	No	Expected Features	Re
		1. This checklist has been completed by the team before the peer assessment	
		2. This Checklist and The PTW -Checklist, are completed (with M -grade), stapeled in order, and located in the Assessment Section of the Design Notebook	
		3. The Backbone of the DNB is well-designed & placed with the correct orientation.	
		4. The Title Page is present as the first page seen when the Notebook is opened up	
		5. The Title Page shows the Team's name (e.g., Team #1)	
		6. The Title Page lists all the team members' names and IDs.	
		7. The Title Page includes the course number and name	
		8. The Title Page has the laboratory course instructor's name	
		9. The Title Page has an e-mail address at which the team can be reached	
		10. There is a Table of Contents (TOC) (this must be <u>updated</u> , and kept in its place, with each DNB submission) (<i>students usually forget this</i>)	
		11. The TOC shows all the sections (i.e., all the divider titles).	
		12. All the items in Design Notebook are shown in the TOC	
		13. The context of assignment L3 is located just behind the TOC page	
		14. There are tabbed section dividers with section names on them <u>at least</u> (the project, meeting minutes, quizzes, assignment-LXXX, L3-context, L3-conclusion and Assessments)	
		15. The tabs are clear and noticeable by the folder explorere	
		16. The quiz section has a complete team set of the original quizzes (whatever completed till now)	
		17. The discussion of assignment L-3 is located by the end of the DNB (this must be <u>updated</u> , and kept in this section, with each DNB submission) (<i>students usually forget this</i>)	
		18. There is a miscellaneous section that contains what is not enough to open a separate section; <i>If there is no such section type 'NA' in the yes cell</i>	
		19. In general; the folder of the DNB is solid, strong, cohesive, in good shape and all included papers are placed with the correct orientation	
A specific cell in the most right column is to be checked in the re-submission only 			
<u>Comments on any of the No's</u>			
Number of lapses issued by the instructor: <i>only the instructor has the right to issue lapses whenever required</i>			

Results of Initial Assessment

M	requires all Yes's for all items in the expected features (Absolutely no lapses)
NI	is given if there is one NO
NCE	is given if there is little to no work to be assessed (starts with at least two Nos)

*If the work was assessed as **NI**, **NCE**, or **NS** you may, following the information given in the LAB-FDM and the instructions given on the Resubmission of Work Checklist, improve the work and resubmit it for re-assessment.*

Upon the final assessment of this task, this checklist and the resubmission checklist (if used) are to be placed in the assessment section.

Setting ASSIGNMENT L-5 (2026)
(Team/Individual Process Checks TPC/IPC)

PI (5.2)

Learning how to **stop** and **review** what you are doing rather than **blindly continuing** down the path you have selected is one of the hardest things to do, especially when the path appears to be leading in a good direction. However, successful, creative people and teams stop periodically and evaluate their plans to help improve what they are doing in order to achieve better final results.

There are a number of different ways to start doing this reflective pausing; **in this class**, you will use a **Team Process Check (TPC)**. The material on productive meetings discusses the need to evaluate the meeting process. The material on Team Norms (Section H of the Blue Workbook) discusses the need to use **Constructive Feedback**, (a type of Process Check), as a powerful method for improving team performance.

The purpose for these **TPCs** is to allow your team to collect data, in a non-judgmental form (i.e., there is no good or bad associated with the responses), on how the team is doing. If the Process Check uncovers areas of concern, then your team can use the check as the starting point for making some improvements in the way the team is performing. The **Instructors** will review these Process Checks to see when teams may need outside facilitation to help them overcome some team difficulty. Doing this assignment is a team activity and must be done as a team.

The Assignment's Learning Objectives

Once this assignment is completed the team will have:

1. Demonstrated its ability to perform TPCs,
2. Demonstrated its ability to monitor and improve its performance (through several rounds), and
3. Uncovered any team dynamics problems.

The Assignment: (Note that: This assignment is to be performed through two rounds)

There is no “correct” process check and, as you see how these process checks are done and used, your team may develop its own variation. However, when you are preparing a **TPCs** you must follow the following procedure:

Round (1): this round must be completed some times this week (L-2)

1. Before the team meeting at which this assignment-round is completed; each member of the team must complete the **Team and individual Process Check (TPC/IPC)** (last two pages of this Document).
2. During the team meeting; at which this assignment is to be completed; the team must come to consensus and complete:
 - An initial consensus- **Team Process Check** and
 - An initial consensus-**Individual Process Check** for each member of the team
3. After the team has generated its consensus versions of the **IPC/TPC**, the various checklists must be analyzed. If :-

- case (i) If any question on any **TPC**-checklist (created in (1)) receives a **5** from more than half of the members; discuss why this is so as a strength point, **or**
- case (ii) If any score on any **TPC**-checklist (created in (1)) is exactly **1**, **or**
- case (iii) If any score on any **TPC**-checklist (created in (1)) is lower than the team's initial-consensus answer by more than one, **or**
- case (iv) If any score on any of the consensus **IPCs** is less than two.

then the team must:

- Discuss the reasons for the low score (this is most likely a good time to use Constructive Feedback to try and get at the root cause of the difficulty.) and
- Develop a team norm (see Section H of the QU Workbook) to ameliorate the problem. This norm may be added to the team norms listed in assignment (L-5) before submission.

Round (2): this round must be completed sometime in (L4, C5 or L5)

This round is to start at least two weeks after the first round. Weeks of L4, C5 or L5 may be a good choice to do that. **In this round**; teams are expected to move 1 or 2 areas of improvement into the strengths column (continuous improvement); therefore; the team must:

1. Review the consensus checklists created in round-1
2. Study the changes/improvements took place since the first-round and the actions taken to do this change (*it may be helpful to report what did you do to treat the weakness appeared when analyzing cases (i, ii, iii and iv)*).
3. **Submit a final TPC with the improved items**

The Submission

You are to submit the following in English and in the order shown:

Soft copy part (word processed)	Paper part (hand writing)
1) The context of the work 2) The work a) the analysis of at least the cases described in item (3) in the first round b) all the work required for the second round c) final summary of the team strength points and weak points. 3) The discussion of the assignment	▪ The assignment checklist + the PTW checklist ▪ the team initial consensus TPC ▪ the team final consensus TPC ▪ the team initial consensus IPC (for all members) ▪ any additional materials (may not be subject of grading)
Limited to 5 pages & is to be uploaded to the associated BB link before the due time	

The Assessment

This assignment is to be assessed using the associated checklist for it.

..... Team Process Check

Date: / /14 Group Team Member Number

Name:

Agree Strongly

Disagree Strongly

1. Everyone comes prepared to our meetings.	5	4	3	2	1
2. Everyone is contributing.	5	4	3	2	1
3. I understand what my team expects me to do.	5	4	3	2	1
4. Someone always seems to know what is needed.	5	4	3	2	1
5. The team is very productive.	5	4	3	2	1
6. The team members are comfortable with each other.	5	4	3	2	1
7. The team uses methods introduced in class.	5	4	3	2	1
8. The team values everyone's contributions.	5	4	3	2	1
9. We all have the same goals in this class.	5	4	3	2	1
10. We have developed ways to resolve conflict and reach consensus.	5	4	3	2	1
11. We stay on track when we are together.	5	4	3	2	1
12. We teach and learn from each other.	5	4	3	2	1
13.	5	4	3	2	1
14.	5	4	3	2	1

How to Compete Team Process Checks

Each member of the team is to complete the above questions (and any optional questions the team has added) and bring their responses to a team meeting where the results will be discussed. During the team discussion a team **consensus** (or team summary) version of the above table is to be developed using this form. Also during the discussion the team needs to address the team's strengths and areas for improvement. During the semester, teams are expected to move 2 or 3 areas of improvement into the strengths column (continuous improvement).

Assignment L-5: TPC/IPC Checklist (from 481)

Team: _____ Work Products Being Evaluated TPC/IPC	Date: _____
Check the opposite box if this is a resubmission	Date: _____

1. Work Evaluated by (self) _____ Assessment Symbol/Color _____ Date _____
2. Work Evaluated by (Instructor) _____ Assessment Symbol/Color _____ Date _____

The top **three lines**, the **self-regulation** issues part and the **expected features** part are to be completed and self-assessed prior to submitting the work.

Yes	No	Self-Regulation Issues (half lapse for each NO)
		A. The assignment was uploaded to the Blackboard in MS-word-format prior to the due date (if this item is marked NO; the final grade will be NS)
		B. There is one and only one Only one submission of the assignment on the Blackboard
		C. The assignment is in five pages (not papers) or less (<i>this does not include the appendices</i>)
		D. The two attached checklists are stapled to the top of the rest of the assignment-work from the left corner.
		E. The top two lines, the tables of the self-regulation issues and the expected features (in this checklist) are self-assessed and completed prior to submission. No other part in this checklist is marked or assessed
		F. The PTW is completely filled out
		G. There are no other Self-Regulation problems (if No state the point here)
		H. Enter a 1 in the box to the left if there are any No's
		Enter number in the box to the left equivalent to the number of No's; this is the number of lapses.
Comments on any of the No's		
Yes	No	Expected Features
		1. The work satisfies the Presentation of Technical Work sub-Checklist
		2. The order of the work attached after the checklists is (the team initial consensus TPC, the team final consensus TPC, the team initial consensus IPC (for all members) and any additional materials)
		3. There is analysis for the questions which can be classified as case(i) , if any (type NA in the yes cell if not). (<i>the questions that have this classifications are number.....</i>)
		4. There is analysis for the questions which can be classified as case(ii) , if any (type NA in the yes cell if not). (<i>the questions that have this classifications are number.....</i>)
		5. There is analysis for the questions which can be classified as case(iii) , if any (type NA in the yes cell if not). (<i>the questions that have this classifications are number.....</i>)
		6. There is analysis for the questions which can be classified as case(iv) , if any (type NA in the yes cell if not). (<i>the questions that have this classifications are number.....</i>)
		7. There is a paragraph titled "changes/improvements took place since the first-round"
		8. There is a paragraph titled "final summary of the team strength points and weak points"
		9. The discussion of the assignment discuss the scenario and the final conclusions the team received out of this assignment and any decision that were made in doing the assignment

Assignment L-5: TPC/IPC Checklist (from 481)

Comments on any of the No's

WOW	Ok	Weak	Revealed Features (for instructor use only)
			Rate the quality of the introduction/context of the entire assignment
			Rate the quality of the scenario used in presenting the entire assignment
			Rate the quality of the analysis for the selected cases (I,ii, iii, iv) used in presenting the entire assignment
			Rate the quality of the developed team norm(s) if any (cross the cells if no norm was developed)
			Rate the quality of the discussion of the entire assignment

Result summary (for instructor use only)

The self-regulation issues that marked No		Count the number of No in the expected features	WOWs	Weaks
Count	Equivalent Lapses			

Assessment (for instructor use only - In general; No piece of lapse is permitted with E)

E	Two WOWs and ZERO NO (the total sum of NO in this checklist is zero)
M	All Yes in the expected features with no single weak (up to 1 Lapse is permitted here)
NI	The sum of (the number of NOs in the expected features and the number of Weak) is 3 or less.
NCE	Is given in any other situation (except what is considered for NS)
NS	If item A is NO (in this case the assessment of the entire checklist is ignored)
	Total SR-Lapses

If the work was assessed as either **NI** or **NCE** the team **MAY** resubmit it (if applicable) on the time set by the course with a new print out of this checklist.

For instructor use only: the percentage of the plagiarism is acceptable	yes	No
---	-----	----

لاعب الفريق

يحكي لنا هذا العرض قصة حقيقية وقعت بالفعل في إحدى الشركات حيث اكتشفت إدارة الشركة أن معاملات عملائها تتعرض لتأخير كبير، لذلك شكلت فريق عمل لبحث وحل هذه المشكلة، وطلب من رئيس الفريق تقديم رؤيته للحل خلال شهر، وتم الاتفاق على عمل اجتماعات دورية أسبوعية لأعضاء الفريق.

في الاجتماع الأول بدا أن أسم فريق لا ينطبق على المجتمعين إلا بالمعنى الواسع الفضايف للكلمة، حيث نشاهد رئيس الفريق يضع يده على خده مبتئساً وهو يرى من المجتمعين من تتشاغل بلعبة ورقية ومن تتحدث بالهاتف ومن يعد القهوة، ويحاول الرئيس توزيع شئ من المهام وحينها ينبه أحد أعضاء الفريق إلى افتقار البعض إلى القدرة على تحمل المسؤولية، وفي الأسبوع الثاني يتفاهم شعور الحاضرين بضيق الوقت من غير إنجاز أي تقدم، ويتم التعرف على المشكلة الأساسية وهي أنهم لا يشكلون فريقاً فعالاً يستطيع أفراد العمل معاً في توائم وانسجام، ويجري طرح الدعوة إلى البحث عن اقتراحات لتحسين الموقف.

وبعد الاجتماع يذهب الرئيس لممارسة لعبة الاسكواش وحينها يختلف مع منافسته حول احتساب إحدى النقاط تلفت نظره إلى القاعدة الحاكمة لهذه الحالة، وتستتير بصيرته بهذه الواقعة إلى ضرورة استحداث قواعد تضبط عمل الفريق، فيذهب إلى الاجتماع الثالث بهذه الفكرة حيث يضع المجتمعون معاً القواعد البسيطة المنظمة لعملهم كفريق وهي قواعد تفصيلية واضحة وليست مبادئ إرشادية فيها من التعميم ما يؤدي إلى اللبس والغموض، ويشعر رئيسي الفريق بأن الوقت قد داهمه فيعد اقتراحات محددة للاجتماع الرابع ويأتي للاجتماع محاولاً فرضها وسط مناصرة من معظم الحاضرين الذين يريدون أن ينفذوا أيديهم من الأمر، ولكن أحد أعضاء الفريق يقول إن فكرة الرئيس نصف ناضجة ويطلب وقتاً لإعداد مقترح بديل، ويعارضه الآخرون ويصوتون لصالح فكرة الرئيس بأغلبية ساحقة، إلا أن إحدى العضوات المؤيدة للرئيس ترفض الاعتداد بالتصويت ما لم يسفر عن إجماع تام، ويتألم الرئيس لأنه سيبدو أمام رؤسائه كشخص فاشل عجز عن إنجاز مهمة يسيرة خلال شهر كامل بسبب التباطؤ الغير مبرر، وتخفف إحدى الحاضرات عنه بقولها إنه كان ثمة فشل أو تقصير فهو راجع للفريق ككل وليس له شخصياً، وينتقل العرض بنا بعد ذلك إلى الاجتماع الخامس حيث كان الرئيس قد استأذن رؤسائه في مهلة إضافية، ويقدم العضو مقترحاً تفصيلياً لإعادة هيكلة نظام العمل، وحينما يتهم الرئيس عليه يذكره الآخرون بقاعدة ألا تخذيل أو تحقير وتقليل من أفكار الآخرين، و يتضح من المناقشات أن المقترح الجديد يطيل في بادئ الأمر مدة إنجاز المعاملات ولكنه في النهاية يؤدي إلى إقرار نظام يعرف فيه كل شخص ما ينبغي عليه عمله تماماً، ويبدأ بعض الأعضاء سخطاً على المقترح ويطالبون بالعودة إلى مقترح الرئيس، ويجدها الرئيس فرصة سانحة للثائر منه على رفضه لمقترحه في الاجتماع السابق لكنه يقاوم نفسه الأمارة

بالسوء ويجهر بتأييد المقترح الجديد ويقوم بنقله إلى الإدارة التي تعجب به وتؤيده، وينتهي العرض بالرئيس وهو يثني على زميله ويوفيه حقه من التقدير والتكريم الذي يرد عليه بنسبه فضل الإنجاز للمحقق للفريق وبخاصة الرئيس. إن معنى الانتماء إلى فريق هو أن تكون عضواً في كينونة أكبر من ذاتك المحدودة بحيث ينشأ القرار عن تشاور الأعضاء لا عن استبداد الأفراد، ولكي يعمل الفريق بفعالية يجب أن يتحمل كل شخص مسؤوليته ويجب أن تدار المناقشة على الجميع بحيث لا يبقى عضو دون مساهمة، فربما كان لديه الرأي الصحيح، كما يجب أن يشعر الجميع بأن وقت الفريق هو أمر مملوك للفريق ككل فلا يجب تضييعه في أي نشاط خارجي، كما يجب عدم التسليم بأول فكرة للحل تطرأ على البال وإنما يجب التزام الطرق العلمية في وضح الحلول، وأخيراً وليس آخراً يحتاج الفريق دائماً إلى التحلي بالجرأة على عمل التغيير وذلك لاقتراح وإنجاز التغييرات الضرورية في الأوقات المناسبة.
