

GE 211 LAB FIRST DAY MATERIALS

1. LABORATORY SECTION LEARNING OBJECTIVES

- 1) Engineering Problem Solving (Move from Knowledge to Application Level of Learning)
 - Formulating the Problem,
 - Solving the Problem,
 - Implementing the Solution,
 - Documenting the Process,
 - Quality Principles.
- 2) Working in Teams (Move from unaware to Comprehension Level of Learning)
 - Team Dynamics,
 - Team Communication,
 - Social Norms,
 - Conflict Management.
- 3) Written/Oral Communication (Move from unaware to Application Level of Learning)
 - Organize and Present Technical Work,
 - Graphical Representations.
- 4) Planning for Success (Move from unaware to Knowledge Level of Learning)
 - Learning to Learn,
 - Assessment of Progress,
 - Time/Project Management.

2. LAB SESSION EXPECTATIONS

The expectations for the Lab Session of the course are listed below. **Meeting Customer Expectations is a characteristic of Self-Regulated Learners** (one of the main Course Objectives for GE 211). We expect that each student/team will:

1. Complete the assigned readings and activities before class (see the GE 211 Course Calendar).
2. Attend and be on time for the scheduled class meetings.
3. Continue the online session with no interruption or absence for part of the time.
4. Attend and be on time for the scheduled team meetings (in or out of class).
5. Actively participate in all learning activities and tasks.
6. Treat teammates with respect.
7. Assess others' work fairly and honestly using the checklists supplied by the faculty.
8. Maintain the team attendance by signing the Lab attendance sheet (after teams are formed).
9. Develop a Design Notebook that the team will bring to each class.
10. Submit **two** Team process checks during the course of the semester.
11. Attend and participate in the course Celebration.
12. **Avoid disruptive behaviors** in class (e.g., side conversations, sleeping, working on homework assignments for other classes, etc.) (see Section 4 of the First Day handout).

GE 211 LAB FIRST DAY MATERIALS

13. Meet or Exceed Expectations on the work products (i.e., project work).
14. Improve work that is assessed as Needs Improvement, No Credible Effort, or No Submit, if permitted.
15. Retain all work for the Lab Session until final grades are posted. If our record of your grades is ever in error, you will need to have your original work to verify your actual grade.

3. LABORATORY GRADE

All the assessable work products in the Lab are team-generated. The details of how your performance on the various assignments is converted into a letter grade are shown in the table on the next page. As long as you actively participate in and contribute to the work generated by your team, your individual Laboratory grade will be the same as your team's Lab grade. However, it is possible for your individual grade to fall below that of your team. If you consistently miss Lab, you will start accumulating individual Self Regulation Lapses after your second missed class. Also, if you consistently fail to be a productive member of your team and receive two or more Team Dynamics Warnings, you will accrue individual Self-Regulation Lapses. Finally, as is the case in the other GE 211 sessions, disruptive classroom behavior will cause you to receive Self-regulation Laps.

4. LABORATORY ASSIGNMENTS

The assignments for the Laboratory Session are a series of documents that are located in the handouts distributed to you. The following assignments are available.

- L1_ Teammate Interview.
- L2_ Setting Team Norms.
- L3_ Preparing Design Notebook.
- L4_ The Project (used for assignments L4.a, b, c, d, and e).
- L5_ Team Process Checks (usually is used **in two rounds** for team process checks).

See table (1) for specific dates and more description.

Refer to Table one in this part of the FDM for the due dates and resubmission dates. The soft copy of some selected assignments are required to be submitted, for some others; both the soft and the hard copies are required and for some others only the hard copy is required.

All of your work for the Lab will be kept in a Team Design Notebook, which the instructors will collect at various times during the semester. More information about the Design notebook is in L3_ Preparing Design Notebook (DNB may be converted to an e-file during online classrooms

Table 1 - Lab Assignments Schedule by Session

Assignment	Required copy		Session Due	Session Returned	Re Submission
	Soft	Hard			
L-1 Teammate Interview	yes	Yes (in full)	L3-1	NA	NA
L-2 Setting Team Norms (step 1)		Draft (not for submission)	L3-1	NA	NA
L-3-0th Team's Design Notebook (Zeroth)		Yes (in full)	L3-2	L4-2	L5-1
L-2 Final-Setting Team Norms (Completed)	yes	Checklists + misc	L4-2	C5-2*	L6-2
L-4-a Presentation of Project Phase (a) + DNB 1 st assessment		Yes (in full)	L4-3	C5-2*	L5-1
L-4-b Presentation of Project Phase (b) + DNB 2 nd assessment		Yes (in full)	L5-1	L5-2	L5-3
L-4-c Presentation of Project Phase (c) + DNB 3 rd assessment		Yes (in full)	L5-3	C6-1*	L6-1
L-5 Team Process Checks	yes	Checklist s+forms + misc	L5-3	L6-1	L6-3
L-4-d Presentation of Project Phase (d) + DNB 4 th assessment		Yes (in full)	L6-1	L6-2	NA
L-4-e Presentation of Project Phase (e) + DNB 5 th assessment		Yes (in full)	L6-3	WBD	NA
L-3-final (Celebration***) DNB (final) and artifact submission		Yes (in full)	***	NA	NA
L-4-Final (Celebration***) – Final project presentation	yes		***	NA	NA

* Ask if not clear

** The assessment of L-4 (parts) will be considered by the end of the return-session returned (or before) and by using the corresponding **DNB** assessment checklist

*** The official date/time for the Celebration is announced on the college calendar and/or the LAB lectures. Any group has the right to change this time/date subject to 100% approval of the group-students and the course instructor. The celebration must be attended and practiced by each student in the existence of all his-group students; otherwise, the student fails the course.

❖ Make sure the class time does not conflict with any (QEC/other) exam time. The priority will be for the class (as it is the class regular hours). It is the student responsibility to raise any conflict issue before session L-1-3.

❖ The grades of the celebration activities are not subject of announcement and/or replaced by any mean

❖ **WBD** Will be decided

❖ For these assignments which are not required to be uploaded to the BB; the instructor has the right to ask any team to upload any of his work to the BB to check the **plagiarism**.

5. ASSESSMENT OF WORK PRODUCTS

One of the skills we want you to develop over the semester is the ability to evaluate your own and others' work critically. In order to do this, you will be peer-assessing other teams' work. This is a skill we think is very important to your development as an engineer, and we ask that you take the peer assessment process seriously. For this to be an effective process, you must learn how to give and receive constructive feedback. Failure to accurately evaluate other teams' work will result in the awarding of Self-Regulation Laps for the team.

There are several checklists associated with your work. These checklists can be found in the GE211-provided materials. The checklist you are going to use must be the correct one and belong to the provided set for the current semester. The use of an inappropriate checklist will be considered as no checklist is submitted.

In general, every work-grade/assessment is subject for discussion within the grading system of GE211 and the associated checklists. Student can discuss (submit an appeal) to his/her instructor in the next lecture he/she was notified by the grade. Absolutely; No discussions after that.

Be alert that: there is no correction, discussion, regarding, or reassessment for the final presentation and the final DNB assessment.

6. ADDITIONAL REQUIREMENTS: ABOUT CHEATING

- a) Over the course of the semester, you will be viewing Design Notebooks from previous semesters and the work done by your peers. **You are in no way allowed to duplicate other teams' work.** If you use someone else's ideas (from another team or from a web search), you must acknowledge the source of the ideas. Failure to provide such a reference to others' work will be viewed as cheating and will be handled by the Cheating Policy of the College (see first-day materials for the course, white pages).
- b) Be aware of plagiarizing someone else work. The plagiarism will be checked for materials submitted with the current and previous semesters. Usually this is done for the e-submission of the works. This semester; some works are required to be uploaded to the BB. Some others are not required. However; for these assignments which are not required to be uploaded to the BB; the instructor has the right to ask any team to upload any of his work to the BB to check the plagiarism.

7. COURSE CELEBRATION (REPEATED FROM THE FDM-PART 1)

There is a Final Exam in GE 211, is called **CELEBRATION**. The time for the Celebration will be set by the group close to the end of the semester. Once agreed upon; the celebration must be attended and practiced by each student in the existence of all his-group students; otherwise, the student fails the course. The celebration is not subject of replacement under any circumstances. The grade of celebration is treated as any final exam grade. Although the course allows the students to improve their grades in many course-works, this is not allowed for the celebration.

Table 2- Laboratory Session Grade Specifications

Quality of Work	Defects	Laboratory Grade
Total Number of Exceeds *	Total Number of Defects	
5 or more	0	A
fewer than 5	0	B
Whatever	1	C
Whatever	2	D
Whatever	3 or 4	F
5 or more defects results in course grade of FAIL		
The 'Defects' are defined below; the impact of the 'defects' on your semester grade represents your Customer's sense of the relative importance of your demonstrating the characteristics of a Self-Regulated Learner. The 'defects' are cumulative .		
Cognitive Problems		Number of 'Defects'
1. one (final assessment of) No Submittal or No Credible Effort		2
2. two (2) or more (final assessments of) No Submittal or No Credible Effort		3
3. One (1) or two (2) (final assessments of) Needs Improvement		1
4. three (3) or four (4) (final assessments of) Needs Improvement		2
5. five (5) or more (final assessments of) Needs Improvement		3
Affective Behavior Problems (self regulation issues)		
6. from four (4) to five (5) Self-Regulation Lapses [†] Team dynamics warning (Each instance after the first is a SR-Lapse.)		1
7. from more than five (5) to seven (7) Self-Regulation Lapses [†]		2
8. more than seven (7) Self-Regulation Lapses [†]		3

[†]Self-Regulation Lapses include but are not limited to: absences, lateness to class, not participating in class activities, being unprepared for class, disruptive or unethical classroom behaviors, failure to cooperate with in-class instructions, minor inappropriate use of QU facilities and property ... etc.. Behavioral expectations are explicitly stated in the white Course First Day materials.

* All peer-awarded grades of Exceeds are subject to instructor approval.

** Whoever gets 4 defects in this session he will never exceed "D" as the course final grade.

***Each occurrence of "lateness to class" will be counted as half (0.5) self-regulation lapse.
